

PROG 2700 - Tech Check 2

Value: 5% of overall course mark

Array FUNctions

Using the data retrieved from the provided API Endpoint, write a function called 'getPopulation' that returns the total population for all countries that BOTH border *China* and list *English* as one of their official languages

Requirements

You are NOT permitted to use FOR, FOREACH, or WHILE loops of any kind.

You must leverage the available JavaScript Array Iteration Functions to accomplish your goal.

https://www.w3schools.com/js/js_array_iteration.asp

https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global_Objects/Array#Iteration_methods

Submission Instructions

Once your program is complete, zip (not RAR and not 7zip and not TAR) up all the resources required to run it and upload to the TechCheck2 Brightspace folder.

Marking Scheme

Final Grade	Requirement
10/10	Tech check is correct (passes all tests) and is completed within the allotted in-class time.
8/10	Tech check is correct (passes all tests) and is completed within a 12-hour grace period beginning immediately following the end of in-class time.
6/10	Tech check is correct (passes all tests) and is completed and submitted after the 12-hour grace period has elapsed.
0/10	Tech check is not submitted or does not pass all tests.
